ABOUT ME

- Thrives in a fast-paced and intense work environment where the highest quality of product is the goal.
- Works equally well in design teams of all sizes as well as individually.
- Proven ability in coordinating all design disciplines on a design project.
- Proficient in all stages of the design process, from architectural programming, concept sketches, design development drawings, to construction drawings and specifications.
- Extensive experience managing construction administration phases of projects of all sizes, from small renovations to major shopping malls.
- Ability to multi-task as well as focus on detail-intensive activities as called for.
- Strong desire to find creative, sustainable and efficient solutions, as well as finding ways to communicate these to others to increase their efficiency.
- Extensive experience working in most jurisdictions in the Lower Mainland.
- Although I grew up and was educated in Halifax, Nova Scotia, I have lived and worked in the Lower Mainland for my entire career, but have been involved in projects located on Vancouver Island and in Alberta, Oregon, Idaho, Colorado, Texas, and Illinois.
- Proficient in AutoCAD, SketchUp, with strong working knowledge of Revit and PhotoShop.
